SUMMARY

AI Engineer & Full-Stack Developer (TypeScript/Python) with 6+ years across QA automation and software engineering. Ship LLM features (OpenAI/Claude, Responses API, RAG/embeddings/vector DBs) with SDET-grade tests (Playwright/Jest) and CI/CD (Azure DevOps/GitHub Actions/Docker). Strengths: Next.js/React front-ends, FastAPI/Node back-ends, guardrails, and reliability in fintech/healthcare/education.

CORE SKILLS

AI/LLMs: OpenAI & Anthropic SDKs (Responses API, tools/actions), ChatKit, Agent Builder/AgentKit, LangChain, LangGraph, Vertex AI, RAG, embeddings, vector stores (pgvector/FAISS), guardrails

Frontend: Next.js, React, TypeScript, Tailwind, SSR/ISR, accessibility & performance

Backend: Python (FastAPI), Node.js/Express, REST/GraphQL, JWT/OAuth, structured errors, observability

QA/SDET: Playwright (E2E/API), Selenium WebDriver, SpecFlow/Cucumber, TestNG/JUnit/MSTest, Jest/Vitest, API/contract, ETL (HL7/PHI)

DevOps: Azure DevOps, GitHub Actions, Docker, quality gates, Selenium Grid

Data: PostgreSQL, MongoDB, SQL Server

EXPERIENCE

AI Full-Stack Software Engineer — Freelance | Remote — Raleigh, NC | Jan 2024 - Present

- Built AI chat apps (Next.js + TypeScript, OpenAI/Claude) with prompt tooling, conversation memory, and role-based access; Playwright in CI prevents regressions.
- Shipped AI toolbar for web-wide invoke with least-privilege access, logging, and privacy/security controls.
- Delivered 15+ workflow automations (Zapier/n8n/Make) and LLM extraction; reduced repetitive work by ~60% with retries/alerts.
- Built REST APIs (Node + FastAPI) with validation and error taxonomy; >90% coverage on critical paths.
- Maintains omerakben.com with ChatKit embed, Vercel CI/CD, Lighthouse tuning, and Playwright E2E.
- Architecture: ChatKit -> Agent Builder (Responses API + tools/actions) -> RAG (Postgres/pgvector); analytics, feedback, evals in CI.

Technology: TypeScript, Next.js/React, Node, FastAPI, OpenAI/Anthropic, ChatKit, Agent Builder/AgentKit, Playwright, Jest, Docker, Azure DevOps, Git, PostgreSQL (pgvector), MongoDB, Zapier, n8n.

Test Automation Architect (SDET) — Oteemo | Remote | Feb 2025 - Sep 2025

- Sole SDET consultant for a Fortune-500 financial services end client; built a production-grade, assetized framework from an empty Azure DevOps repo.
- Multi-env setup (dev/test) with config isolation; Dockerized local runner; reusable starter repo for fast onboarding.
- Framework: C#/.NET Selenium + MSTest, Page Objects, data factories, RestSharp API layer; stability-first waits/retries -> ~98% pass rate.
- Adoption & mentorship: utility classes and setup patterns copied by client teams; docs/runbooks and hands-on coaching.
- Supported internal projects on repo structure and build best practices.

Technology: Stack: C#, .NET, Selenium, MSTest, RestSharp, Azure DevOps (Repos), Docker, SQL Server, Git, NuGet.

QA Engineer — ECS (Engineering Consulting Services) | Raleigh, NC (Hybrid) | Apr 2023 - Jan 2024

- Rewrote utility classes/generics/statics; team velocity +20% via cleaner abstraction and reuse.
- Converted manual API tests to Postman Collections (JS scripts); reduced manual-tester backlog by ~10%.
- Mentored manual testers; templates/checklists for simple automation cases.
- Modernized Page Object -> Page Factory; stability ~95% pass rate, maintenance -30%.

Technology: Stack: C#, MSTest, Selenium, RestSharp, Azure DevOps, D365, SQL Server, Postman.

SDET / QA Test Automation Engineer — Xsolis | Franklin, TN (Remote) | Oct 2022 - Apr 2023

- Automated ETL + UI/API for HL7/PHI with Selenium + SpecFlow (BDD); coverage 40% -> 85%, manual effort -30%.
- Coordinated with EPAM; aligned frameworks/standards/reviews; shared Postman collections.
- Used Atlassian (Jira/Confluence), Azure DevOps, qTest; added xUnit tests and API verifications.

Technology: Stack: C#, .NET, Selenium, SpecFlow (BDD), xUnit, SQL, Azure, Jira/Confluence, qTest, Postman.

SDET / QA Automation Engineer — Fannie Mae | Washington, DC (Remote) | Apr 2021 - Sep 2022

- UI/API automation (Selenium + TestNG + REST Assured); release velocity +10% with ~20% automated coverage on key modules.
- Jenkins + Selenium Grid (50+ concurrent); regression time -15%; API contract tests across microservices.

Technology: Stack: Java, Selenium, TestNG, REST Assured, Jenkins, Selenium Grid, Git/Maven.

QA Automation Engineer — Delaware State Chamber of Commerce | Wilmington, DE (Hybrid) | Sep 2018 - Mar 2021

- Built Java/Selenium/JUnit framework in Jenkins; automated coverage +35%, API defects -30%.
- SQL validation across 50+ tables for data integrity.

Technology: Stack: Java, Selenium, JUnit, Jenkins, SQL, Git/Maven.

PROJECTS

AI Chat — University client — Next.js/TypeScript • FastAPI • OpenAI/Claude • ChatKit • Agent Builder • pgvector • Microsoft Entra ID (auth) • Playwright

- Role-based access and memory; architecture: ChatKit -> Agent Builder -> RAG (Postgres/pgvector); auth via Microsoft Entra ID.
- Full E2E via Playwright; documentation and onboarding for 200+ faculty/staff.

Portfolio App — omerakben.com — Next.js/TypeScript • Vercel CI/CD • Playwright • ChatKit

- ChatKit embed, analytics, performance budgets, Lighthouse tuning, Playwright smoke/regression testing.
- Design-system foundation; integrates selected tuel components.

Nonprofit Automation Playbooks (Greensboro, NC) — Google Workspace • n8n • Zapier/Make • Postman • LLMs

- Intake -> enrichment -> routing across Forms/Email/Sheets/CRM with retries/alerts/dashboards.
- Shared Postman collections and runbooks; trained volunteers; templated flows for reuse.

tuel ([npm packages](#)) — React Animation Components — TypeScript • ESM • Storybook

- Typed, tree-shakable components for page/section transitions; CI-tested.
- Used in omerakben.com and internal showcases.

EDUCATION & CERTIFICATIONS

- Nashville Software School — Full-Stack Web Developer Bootcamp | Nashville, TN | 2024-2025
Key topics: JavaScript/TypeScript, React/Next.js, Python/FastAPI, Django, TDD, CI/CD
- TechCenture Academy — Full-Stack Software Development Engineer in Test (SDET) | Fairfax, VA | 2017-2018
- Istanbul Okan University — Master of Science in Healthcare | Istanbul, Turkey | 2014-2016
- Agentic AI Course for Software Development — in progress
